

Democratic Congo Energy Storage Mobile Power Export Company

Overview

Is the Democratic Republic of the Congo an energy exporter?

One of the Inga dams, a major source of hydroelectricity in the Democratic Republic of the Congo. The Democratic Republic of the Congo was a net energy exporter in 2008. Most energy was consumed domestically in 2008. According to the IEA statistics the energy export was in 2008 small and less than from the Republic of Congo.

What is the main energy resource of the Democratic Republic of Congo?

Hydroelectric power (See Annex 1) is the main energy resource of the Democratic Republic of Congo. The DRC ranks first in Africa in terms of its potential (100,000 MW), which accounts for 13% of the global hydropower potential.

Who is Congo energy?

Congo Energy is a Congolese company which is contributing to the recovery and development of the energy sector in the Democratic Republic of the Congo (DRC). Congo Energy offers products that reduce consumption while optimising the quality of installations. The company focuses on 4 areas: Electrical infrastructure for industries.

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power their facilities.
