

Democratic Republic of Congo Solar Containerized Grid- Connected Type

Overview

How will a green mini-grid impact the DRC?

Successful implementation is expected to spur future development of private sector green mini-grids that not only address the country's clean energy targets but also reduce the country's GHG emissions from the energy sector by displacing diesel-based generation across the DRC.

Does DRC have a mini-grid strategy?

The World Bank Group is working with the government on DRC's strategy on mini-grids and increased focus on delivering mini-grids at scale in the country.

How many people will benefit from a solar-hybrid grid in DRC?

More than 180,000 people and businesses are expected to benefit from first-time access to electricity or an improved connection through the roll out of a 13.7MWp portfolio of solar-hybrid isolated grids in DRC.

Is there an interconnected national power transmission network in the DRC?

There is no interconnected national power transmission network in the DRC, which is instead structured into three independent interprovincial grids. The western and southern grids are connected by a High Voltage Direct Current (HVDC) line. The eastern grid is more remote and will not be connected.
