

Directly install solar panels on the tiles

Overview

How to install solar panels on a tile roof?

To install solar panels on a tile roof, first bolt aluminium-alloy brackets to the roof, then attach rails to the brackets. Next, use specially designed clips to attach the solar panels to the rails, bolting them onto the edges of the panels.

Can solar panels be installed on clay-tiled roofs?

Until recently, installing solar on clay-tiled roofs has been a more expensive and risky endeavor than other roof types, like composite shingle or metal. This is because tiles are relatively expensive, fragile, and removing them to install roof mounts for solar panels can open up the seal of your roof to water damage.

How do I install a solar roof?

For battens of other sizes or sarked roofs, alternative kits are also available. Begin by installing the first solar roof panel in the array - this should be the one located on the bottom left. Work up each column, then move to the right. The tiles can be installed in either landscape or portrait orientation using the same method.

Can a solid Solar Installer install concrete tiles?

For concrete tile roofs, a solar installer can install solar panels. They will temporarily remove just a few tiles, install base plates onto the roof membrane, and attach special hooks to them.
