

# **Distributed solar panels in Ireland**

## Overview

---

Do solar PV panels work in Ireland?

Solar PV systems work extremely well in Ireland due to long hours of daylight and low ambient temperatures. Why not combine solar energy with EV charging to maximise savings. With utility costs continuing to rise solar PV panels are the future! Solar PV Panels Ireland are an SEAI registered company.

How many small-scale solar panels are there in Ireland?

To date, more than 120,000 small-scale solar systems have been installed nationwide, with a combined capacity of 500 MW. This is equivalent to more than one million panels now generating clean energy across Ireland's rooftops.

How big is Ireland's solar capacity?

According to data from a newly launched tracker tool by Kilowatt.ie for small-scale solar in Ireland, capacity has grown from 20 MW in 2019 to 500 MW currently. Growth has surged since 2022, thanks to policy changes.

How many rooftop solar projects are there in Ireland?

According to new figures from Ireland's distribution system operator (DSO) ESB Networks, the country now has more than 100,000 rooftop solar projects, cumulatively adding more than 400 MW of clean energy to the national grid.
