What are the components of a distribution board?

The size and configuration of a distribution board depend on the total electrical load and the number of circuits required. Inside the enclosure, key components include the main switch, circuit breakers, earth leakage devices, and bus bars—all working together to protect against overloads, short circuits, and earth faults.

Where is a distribution board located?

Typically located near the main electrical feed, every property will have at least one distribution board. The size and configuration of a distribution board depend on the total electrical load and the number of circuits required.
