

Doha Family Solar Energy System Application

Overview

How to develop solar power in Qatar?

Currently, efforts have focused on developing solar capacity in the country through research centers, universities, utilities and pilot projects, and a number of institutions including Kahramaa, Qatar Foundation, QNFSP and QSTP are actively working on this front.

What is Qatar's Solar Energy Future?

Qatar's solar energy future is steadily developing. With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country.

Is Qatar a good country for solar power?

With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country. Qatar's global horizontal irradiance is 2,140 kWh per m² per year which makes it well-suited for solar photovoltaic (PV) systems.

Will Qatar install solar panels on a redundant roof?

To make up for Qatar's space constraints, the company plans to install solar panels on redundant surfaces such as roofs of power stations and water reservoirs, thereby utilizing existing power transmission lines which will substantially reduced construction costs.
