

Double-glass module production capacity

Overview

Why is double-glass module a good choice for power plants?

The scale of installed capacity gets larger and larger. The power plants have also been built in more diverse environments, such as on fish farms, tidal flats, in deserts, etc. Double-glass module is not subject to potential induced degradation (PID) and boasts excellent durability, low permeability, long life cycle and other superior qualities.

What is the best double-glass module?

When it comes to double-glass, Trina Solar's double-glass module is the most sought after product in the market. It was one of the first companies to promote and commercialize double-glass modules, and it has won industry-wide recognition for its high quality.

What is double-glass bifacial module in 2019?

The double-glass bifacial module in 2019 is going to spread its wing starting from the domestic market. Under the pressure of subsidy-free plant development, such modules will be widely applied to utility-scale PV plants and then to distributed PV projects.

Why should you choose double-glass module?

Double-glass module is not subject to potential induced degradation (PID) and boasts excellent durability, low permeability, long life cycle and other superior qualities. Its many advantages have enabled it to yield impressive results in China's Top Runner Program.
