

# **Electricity consumption of 5G base stations in Sweden**

## Overview

---

How does mobile data traffic affect the energy consumption of 5G base stations?

The explosive growth of mobile data traffic has resulted in a significant increase in the energy consumption of 5G base stations (BSs).

Should power consumption models be used in 5G networks?

This restricts the potential use of the power models, as their validity and accuracy remain unclear. Future work includes the further development of the power consumption models to form a unified evaluation framework that enables the quantification and optimization of energy consumption and energy efficiency of 5G networks.

How can we improve the energy efficiency of 5G networks?

To improve the energy efficiency of 5G networks, it is imperative to develop sophisticated models that accurately reflect the influence of base station (BS) attributes and operational conditions on energy usage.

Does 5G increase energy consumption?

However, this technological leap comes with a substantial increase in energy consumption. Compared to its predecessor, the fourth-generation (4G) network, the energy consumption of the 5G network is approximately three times higher .

## Electricity consumption of 5G base stations in Sweden

---

Modeling 5G Network Energy Consumption Caused by ...

17], where the energy consumption of 5G base stations was modeled using machine learning. The data included user equipment re-ports, as well as measure ents of both downlink (DL) and ...

---

Comparison of Power Consumption Models for 5G Cellular Network Base

Jul 1, 2024 · This paper conducts a literature survey of relevant power consumption models for 5G cellular network base stations and provides a comparison of the models. It highlights ...

---

5G and Energy Efficiency

Feb 25, 2023 · automation, health, etc. The main idea behind 5G is to minimize total network energy consumption, despite increased traffic and service expansion due to its use for these ...

---

Energy Consumption Modelling for 5G Radio Base ...

Mathematical optimization of energy consumption requires a model of the prob-lem at hand. In this thesis linear regression is compared with the gradient boosted trees method and a neural ...

---

Power consumption based on 5G communication

Oct 17, 2021 · At present, 5G mobile traffic base stations in energy consumption accounted for 60% ~ 80%, compared with 4G energy consumption increased three times. In the future, high ...

---

A technical look at 5G energy consumption and performance

Sep 17, 2019 · How can 5G increase performance and ensure low energy consumption? Find out in our latest Research blog post.

---

Modelling the 5G Energy Consumption Using Real-world ...

Sep 15, 2025 · Accurate energy consumption modeling is essential for developing energy-efficient strategies, enabling operators to optimize resource uti-lization while maintaining network ...

---

Sustainable Connections: Exploring Energy Efficiency in 5G ...

Dec 9, 2024 · This paper investigates energy consumption issues from widespread 5G deployment using city-scale real-world mobile network data. Our dataset includes traffic ...

---

5G Base Stations: The Energy Consumption Challenge

Dec 11, 2020 · Although 5G is gaining momentum, several deployment and operational challenges have been troubling MNOs. Amongst these challenges, the most notable one is the ...

---

A technical look at 5G energy consumption and performance

Base Station Power ConsumptionEnergy Saving Features of 5G New RadioHow Much Energy

Can We Save with Nr Sleep Modes? Impact on Energy Efficiency and Performance in A Super Dense Urban Scenario  
Further Reading  
Today we see that a major part of energy consumption in mobile networks comes from the radio base station sites and that the consumption is stable. We can also see that even in densely deployed networks, as in city centers, the network traffic load can fluctuate very much during the day, with significant periods of almost no traffic in the base station. See more on ericsson IEEE Xplore  
Power consumption based on 5G communication - IEEE Xplore  
Oct 17, 2021 · At present, 5G mobile traffic base stations in energy consumption accounted for 60% ~ 80%, compared with 4G energy consumption increased three times. In the future, high ...

---

Energy consumption optimization of 5G base stations ...

Aug 1, 2023 · An energy consumption optimization strategy of 5G base stations (BSs) considering variable threshold sleep mechanism (ECOS-BS) is proposed, which includes the initial ...
