

# Energy Storage New Energy Overseas Sales

## Overview

---

Why are Chinese energy storage companies expanding in Europe?

Due to the strong demand for electrification in Europe and requirements around battery localisation, since 2019, Chinese energy storage companies have been gradually expanding in the European market, fully leveraging the synergies of vertical integration in their industry.

Why should Chinese new energy companies go abroad?

With its vast market space, high profitability, and positive policy support, Europe has become the main destination for Chinese new energy companies looking to go abroad. In this region, Chinese companies have demonstrated strong competitiveness in areas such as photovoltaics, energy storage, and wind energy.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Will Chinese new energy companies go abroad in 2024?

To support Chinese new energy companies in going abroad, in 2024, KPMG China released two reports on new energy enterprises venturing into Southeast Asia and those heading to the Middle East. This newly released report, "Setting to Europe and America," is the concluding piece of the series.
