

Energy storage 3 09MWh solution

Overview

Is CATL launching a new energy storage system?

CATL (SHE: 300750) has rolled out a new energy storage system called Tener Stack in a bid to consolidate its position in the sector. The Chinese battery giant launched the Tener Stack at the battery storage show in Munich, Germany, on May 7, calling it the world's first production-ready 9 MWh ultra-high-capacity energy storage system solution.

Is CATL Tener energy storage a Bess system?

"CATL has always been at the forefront of the energy transition," said Amanda Xu, CTO ESS & President of ESS Europe CATL. "To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution.

Is 9 MWh the limit of energy capacity?

"9 MWh is not the limit of the energy capacity or space. Every breakthrough in energy density in the future will unleash greater energy value from a smaller footprint." Hank Zhao, CTO of ESS Europe CATL. According to the Chinese company, this new product enhances land-use efficiency by 40% and reduces total station construction costs by 20%.

Which energy storage systems are suitable for centered energy storage?

The CAES and PHES are suitable for centered energy storage due to their high energy storage capacity. The battery and hydrogen energy storage systems are perfect for distributed energy storage. Presently batteries are the commonly used due to their scalability, versatility, cost-effectiveness, and their main role in EVs.
