

# Energy storage project cuts

## Overview

---

What projects are being cut from the Department of energy?

Projects promoting hydrogen, electric vehicles, carbon capture and direct air capture are among the list of potential cuts from the Department of Energy, according to a leaked list reviewed by The Times.

Is the energy storage sector facing significant turbulence?

Representational image. Credit: Canva The U.S. energy storage sector is facing significant turbulence as approximately 21 GWh of planned battery cell capacity for 2028 has been either canceled or delayed so far in 2025.

Why did Democrats cut funding for energy hubs & other energy projects?

Democratic lawmakers argued that cutting funding for the hubs and other energy projects would be hypocritical to Republicans' stated goal to increase U.S. energy output — and would be another example of the Trump administration's legally dubious effort to impound congressionally appropriated money.

Does DOE funding energy research need to be cut?

Rep. Morgan Griffith (R-Va.), who chairs the environment subcommittee of the Energy and Commerce Committee, said he supports DOE funding research into all forms of energy, but there is a "huge group" of non-research grants that need to be cut to get federal spending under control.
