

# Equatorial Guinea energy storage power supply manufacturer

## Overview

---

What is the electricity rate in Equatorial Guinea?

Electrification rates are relatively high in Equatorial Guinea at 66%. The country began oil production in the late 1990s and began LNG exports in 2007.

What are the different types of energy transformation in Equatorial Guinea?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Equatorial Guinea for 2022. Another important form of transformation is the generation of electricity.

What transformations are taking place in Equatorial Guinea in 2022?

No data for Equatorial Guinea for 2022. Another important form of transformation is the generation of electricity. Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions – during which up to half of their energy content is lost.
