

Finland container battery factory system

Overview

Where is Finland's new battery storage facility located?

In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid. The plant, equipped with 26 PowerTitan 1.0 containers from Sungrow, delivers 30 MW of output and 60 MWh of storage capacity.

Can battery storage support Finland's power grid?

One of the world's northernmost battery storage systems is now supporting Finland's power grid as part of a joint venture between Sungrow and FRV AmpTank. In northern Finland, less than 100 kilometres south of the Arctic Circle, a new battery storage facility is now supporting the stability of the regional power grid.

Is Finland a possible location for a battery cell factory?

SVOLT states in its press release that Finland is one possible location of the future factory. The EIA procedure for the planned battery cell factory in Kotka examines a maximum annual production capacity of 50 gigawatt hours. Roughly estimated, a capacity of 10 gigawatt hours means an investment of around one billion euros.
