

# Finland energy storage container customization company

## Overview

---

Why do we design and manufacture batteries in Finland?

Our goal is to accelerate the shift by decarbonizing electricity, enabling electric transportation, and reducing heating emissions for a cleaner future. We design and manufacture our batteries in Finland, a country renowned for its engineering excellence and commitment to sustainability.

What is an energy storage system?

An energy storage system enables property-specific optimization of electricity consumption and energy costs. It can also be used to participate in grid frequency reserve markets. Enico | Jupiter scales to large-scale renewable energy applications and hybrid power plants.

Who is heliostorage?

Heliostorage's journey began with a group of creative engineers in a garage, determined to make heating better and more efficient. We were driven by the age old issue caused by seasonality; In winter, when it's cold and sunny days are rare, buildings need heating. In summer, when there's plenty of sun, buildings need cooling.
