

# Flat-floor installation of solar container energy storage system

## Overview

---

How does a solarfold storage system work?

The storage system is based on proven lithium-ion technology (LiFePO) and sophisticated electronics. The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house).

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is LZY solar storage?

LZY offers large, compact, transportable, and rapidly deployable solar storage containers for reliable energy anywhere.
