

Flexible solar panel production in Stockholm

Overview

Where are CIGS solar cells made?

Our solar cells are manufactured at our production facilities in Järfälla, Sweden, and Bari, Italy, using our proprietary DUO system, the world's most prevalent production system for flexible CIGS solar cells. After manufacturing, the solar cells are assembled into complete solar panels at the same locations.

What is a flexible solar panel?

A flexible solar panel with record low weight, adapted for large roof surfaces. The product is sold as a retrofit on your existing roof or as a complete roof replacement. An aesthetic solar panel for standing seam metal and bitumen roofs, installable with new or existing roofs, offering a flexible and sustainable energy solution.

Where are solar cells made?

At our two factories in Stockholm, science, production and environmental responsibility merge as we manufacture solar cells on an industrial scale.

Where are Midsummer solar cells made?

Midsummer's solar cells are a Swedish innovation and are manufactured both in Sweden and Italy. With a minimal weight of only 3kg per square meter, our solar cells enable installation on roofs with weight restrictions without compromising the structural integrity of the roof.
