

# **French home battery energy storage project**

## Overview

---

This 240MW/480MWh project will perform three essential functions within France's energy landscape: optimizing the use of decarbonized electricity, providing critical capacity during peak demand periods, and enhancing grid stability with near-instantaneous response capabilities. Where is France's largest battery energy storage system located?

TagEnergy, in partnership with Tesla, has officially begun construction on France's largest battery energy storage system (BESS) in Cernay-lès-Reims, located in the department of Marne .

Who is delivering a battery energy storage system in France?

China's Envision Energy has been selected by Kallista Energy to deliver a 120 MW/240 MWh battery energy storage system (BESS) in Saleux, northern France. The project represents Envision's first independent storage contract in the French market and signals its continued European expansion.

Will ABN AMRO be the largest battery energy storage system in France?

Dan Dorner, Chief Commercial Officer Corporate Banking said: "We are happy to have supported this landmark project, which will become the largest battery energy storage system in France upon its completion. This marks ABN AMRO's first BESS transaction in France, and builds upon our broader BESS and renewable energy track record.

What is tagenergy's 'largest transmission-connected battery energy storage system in the UK?

In October, TagEnergy energised the 100MW/200MWh Lakeside battery energy storage system (BESS) - which it says is the "largest transmission-connected BESS project in the UK" - in Drax, North Yorkshire. TagEnergy is to begin construction of France's "largest battery energy storage platform", a 240MW/480MWh project in Cernay-lès-Reims.
