

# **Gambia Zero Carbon Energy Storage Industrial Park Project**

## Overview

---

Why is a solar power plant important in the Gambia?

H.E. Corrado Pampaloni, Ambassador of the European Union to The Gambia, stated that this solar power plant is particularly important for the Gambia as it is part of the 'Gambia Electricity Restoration and Modernization Project' and contributes to a swift transition towards solar power and clean energy supply across the country.

Does the European Investment Bank support a new solar plan in Gambia?

Mr. Ambroise Fayolle, Vice-President at the European Investment Bank (EIB), stated that he is delighted that the European Investment Bank is supporting this new solar plan with such economic and social impact for populations in Gambia, particularly in rural areas.

How much money does the Gambia need to achieve net-zero emissions?

Therefore it will require an average of USD138 million per annum in funding, between now and 2050 in order to achieve its target of net-zero emissions by mid-century. This figure may seem astronomical for a small country like The Gambia, however it is nothing compared to the price of inadequate action.

Will the Gambia achieve universal access to electricity by 2025?

The Gambia aims to achieve Universal Access to electricity by 2025, as stipulated by H.E President Adama Barrow. NAWEC will implement this goal primarily through its grid infrastructure, benefiting from the country's favourable geography.
