

# Germany solar container lithium battery pack wholesale

## Overview

---

How are lithium-ion batteries made?

Battery modules for lithium-ion batteries consist of several battery cells that are connected to each other. Their production takes place in automated assembly lines (partly under dry room or cleanroom conditions). Very high speed and precision as well as maximum cleanliness are important factors for economical production of the modules.

What is battery packaging?

Our battery packaging complies with the current hazardous goods regulations and is specially adapted to your hazardous goods. Battery modules for lithium-ion batteries consist of several battery cells that are connected to each other. Their production takes place in automated assembly lines (partly under dry room or cleanroom conditions).

How can a battery system be shipped?

The appropriate battery packaging in the form of a hazardous goods and transport container for shipping the modules can also be obtained from us. We can also carry out the tests and inspections for hazardous goods approval for you on request. The key component of a battery system is the battery cells that store and release the energy.

What are the different types of battery packaging solutions?

The solutions include workpiece carriers, containers and magazines. Our battery packaging can be made from conductive plastics and protects your sensitive components from dangerous electrostatic discharges (ESD). They are also suitable for semi-automated and fully automated handling.
