

# **Ghana household energy storage subsidies**

## Overview

---

This paper investigates the extent of welfare distribution amongst households in Ghana due to the government's subsidies on electricity and water as part of its relief package to households on the fallout of the.

What does the new government mean for Ghana's energy sector?

**New Ministry of Energy & Green Transition** The new government led by H.E. John Dramani Mahama has signaled a commitment to greening the national grid by expanding the scope of the Energy Ministry to include the Green Transition in its portfolio. This marks an important policy shift towards greening Ghana's energy sector.

Does Ghana have solar power?

Ghana's daily solar insolation levels range from 4 kWh/m<sup>2</sup> to 6 kWh/m<sup>2</sup>, with a sunshine duration between 1800 and 3000 hours per year, which offers a high potential for solar electricity generation. Wind energy also holds untapped potential, particularly along Ghana's coastal regions, where wind speeds are favorable for electricity generation.

Why is Ghana facing a financial crisis?

Ghana's energy sector faces a financial crisis that threatens its long-term sustainability, efficiency, and ability to drive economic growth.

Could wind power be a viable energy source for Ghana?

Wind energy also holds untapped potential, particularly along Ghana's coastal regions, where wind speeds are favorable for electricity generation. Integrating wind power, solar, and battery storage solutions to complement the thermal plants could provide a stable and reliable energy supply for the country.
