

# **Gravity solar container energy storage system Price**

## Overview

---

The typical gravity energy storage system cost ranges from \$50 to \$150 per kWh installed capacity. But that's like saying "a car costs between \$20,000 and \$200,000" - we need to dig deeper. How much does gravity storage cost?

For Gravity Storage systems, the levelized cost of storage decreases as the system size increases. Based on the system cost, GES with an energy storage capacity of 1 GWh, 5 GWh, and 10 GWh has an LCOS of 202 US\$/MWh, 111 US\$/MWh, 92 US\$/MWh, respectively. This can be explained by the fact that the system CAPEX decreases with an increased capacity.

What is gravity energy storage system?

Gravity energy storage system is an innovative energy storage concept based on the same principle as PHES. This system has attracted attention lately due to the many benefits it provides as it does not require any special geographical requirement [ 39 ].

Is gravity energy storage a good investment?

The results reveal that GES has resulted in good performance metrics including IRR and NPV of project and Equity, as well as ADSCR, and LLCR. In addition, for a 1 GW power capacity and 125 MWh energy capacity system, gravity energy storage has an attractive LCOS of 202 \$/MWh.

Which energy storage technologies are included in the 2020 cost and performance assessment?

The 2020 Cost and Performance Assessment provided installed costs for six energy storage technologies: lithium-ion (Li-ion) batteries, lead-acid batteries, vanadium redox flow batteries, pumped storage hydro, compressed-air energy storage, and hydrogen energy storage.
