Overview

Should you use a grid-tied solar inverter?

You will always experience some advantages when using a grid-tied solar inverter compared to other solar panel systems. Rather than a hybrid system with a battery, this is way cheaper. This system needs only a few pieces of equipment so the initial cost is always low. This will meter the surplus power which you can sell to the grid.

What is a grid connected solar system?

A grid-tied solar system has a special inverter that can receive power from the grid or send grid-quality AC power to the utility grid when there is an excess of energy from the solar system. Figure. Grid-Connected Solar Photovoltaic System Block Diagram.
