## Overview

---

What is grid connected inverter?

Grid connected inverter is a crucial component in solar power systems that integrate with the electrical grid. For series of 300 watt to 1000 watt rated power inverters, feature with pure sine wave output, no battery design, wide DC input (20V-50V DC) and AC output (90-140V AC / 180-260V AC) range.

What is a grid tie power inverter?

Wide DC input voltage range of 180-500 volts and default 1-phase AC output of 230 volts, LCD main parameters in single phase grid tie inverter, perfect electrical protection function. Wind power generation and solar panel power generation often use grid tie power inverters.

What is a solar on grid inverter?

On grid power inverter comes with a wide MPPT range, a maximum input voltage of 500 volts, a default one-phase 230-volt / 240-volt AC output, 5 years standard warranty, flexible communication connection, and RS485C / RS232 or WiFi. Solar on grid inverter is widely used in rural electrification and remote location.

What is 5000W Solar Grid tie inverter?

5000W three phase pure sine wave solar grid tie inverter with 200V-820V DC wide input voltage range, customized 208V/ 380V/ 480V AC output voltage to adapt to the needs of different occasions. IP65 compatible, no transformer type, 2 MPPT with various communication modes of 5kw on grid inverter.
