

# Hanoi Solar Power System

## Overview

---

Does Hanoi city have solar energy potential?

The solar energy potential in Hanoi city was analyzed. A methodology for assessment of rooftop solar power technical potential has been presented. The total installed capacity and the total generated electricity of rooftop grid-tied solar power system in Hanoi city are calculated.

How much electricity can be generated by rooftop solar power in Hanoi?

Our results indicate that, the capacity and electricity values of rooftop solar power in each district in Hanoi are different and the total electricity of 37,591,481.20 MWh per year can be generated by using the rooftop solar power in the city.

Why is the development of rooftop solar power business in Hanoi affected?

The development of the rooftop solar power business in Hanoi is also affected because there is no specific assessment of the potential of this kind of solar energy.

Does Hanoi need a detailed assessment of rooftop solar power technical potential?

According to requirement of Hanoi People's Committee, a detailed assessment of rooftop solar power technical potential is necessary for the evaluation of the development capability of this renewable power source in Hanoi.
