

Helsinki New Energy Storage

Overview

What is the future of energy storage in Finland?

Reserve markets are currently driving the demand for energy storage systems. Legislative changes have improved prospects for some energy storages. Mainly battery storage and thermal energy storages have been deployed so far. The share of renewable energy sources is growing rapidly in Finland.

Which energy storage technologies are being commissioned in Finland?

Currently, utility-scale energy storage technologies that have been commissioned in Finland are limited to BESS (lithium-ion batteries) and TES, mainly TTES and Cavern Thermal Energy Storages (CTES) connected to DH systems.

Is this Finland's largest battery energy storage system?

Swedish flexible assets developer and optimizer Ingrid Capacity has joined hands with SEB Nordic Energy's portfolio company Locus Energy to develop what is claimed to be Finland's largest and one of the Nordics' largest battery energy storage systems (BESS). The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland.

How big is Finland's underground heat storage system?

At more than 1 million cubic meters in size, the underground heat storage system will have a total capacity that corresponds to the annual heating demand of a medium-sized Finnish city. The 90 GWh seasonal thermal energy storage will be built in Vantaa, near Helsinki.

Helsinki New Energy Storage

Finland's Giant Sand Batteries Are Changing the Way We ...

Jul 2, 2025 · Introduction As the world races toward clean and renewable energy, Finland has introduced a groundbreaking solution--giant sand batteries. These eco-friendly storage ...

Finland to host 90 GWh thermal energy storage system

Apr 9, 2024 · Vantaa Energy plans to construct a 90 GWh thermal energy storage facility in underground caverns in Vantaa, near Helsinki. It says it will be the world's largest seasonal ...

Decarbonizing Heat and Industry: The Role of ...

How Finland's Sand Battery Sets a New Benchmark in Thermal Storage At the core of Finland's sand battery is a deceptively simple yet technically ...

Decarbonizing Heat and Industry: The Role of Finland's Sand ...

How Finland's Sand Battery Sets a New Benchmark in Thermal Storage At the core of Finland's sand battery is a deceptively simple yet technically sophisticated process. It involves resistive ...

Finland to host 90 GWh thermal energy ...

Apr 9, 2024 · Vantaa Energy plans to construct a 90 GWh thermal energy storage facility in underground caverns in Vantaa, near Helsinki. It says it ...

Helsinki's New Energy Storage Industry: Powering the Future ...

Feb 9, 2023 · Let's face it--when you think of energy storage innovation, your mind probably jumps to Silicon Valley or Shanghai. But here's a plot twist: Helsinki is quietly becoming the ...

Finland activates world's largest sand battery to store ...

Jun 19, 2025 · The new installation reaches temperatures between 400 and 500 degrees Celsius. Well-insulated storage ensures that heat losses remain around 10 percent, enabling the ...

Finland to host 240 MWh of new BESS projects

Mar 11, 2025 · The energy system is in real need of efficient and well-managed storage to make the most of its abundant wind resources." The challenges in balancing the nation's grid due to ...

World's Largest Thermal Energy Storage to be Built in Finland

Apr 9, 2024 · A seasonal thermal energy storage will be built by Vantaa Energy in Vantaa, which is Finland's fourth largest city neighboring the capital of Helsinki. When completed, the ...

Hot Heart of Helsinki: A Groundbreaking Case Study in Renewable Energy

Jan 6, 2025 · Helsinki, the capital city of Finland, is rapidly emerging as a global leader in sustainable energy innovation. One of its most ambitious projects, Hot Heart, is reshaping the ...

A review of the current status of energy storage in Finland ...

Jul 15, 2024 · This study reviews the status and prospects for energy storage activities in Finland. The adequacy of the reserve market products and balancing capacity in the Finnish energy ...

Finland's Energy Storage Revolution: Powering New Energy ...

Enter Finland's new energy storage trifecta: cryogenic liquid air systems, volcanic rock thermal batteries, and something called "sand batteries" (yes, really). The Pyhäjoki pilot plant - you ...
