

# **High-efficiency trading conditions for Nordic photovoltaic containers**

## Overview

---

How stable is the trade network of the photovoltaic industry chain in 2023?

Comparison of changes in network characteristic values after intentionally attacking the top 10% nodes in the downstream of the photovoltaic industry chain. In conclusion, compared to 2000, the trade network of each link of the PV industry chain is more stable in 2023. There is a slight increase in network destruction resistance.

What is the global demand for photovoltaic products?

For downstream products, with the increasing emphasis on renewable energy, the global demand for photovoltaic products continues to rise. Especially in developing countries, there is a huge demand for infrastructure construction. The investment and construction efforts in photovoltaic power plants are also continuously increasing.

Is photovoltaic power a solution to the energy crisis?

Provided by the Springer Nature SharedIt content-sharing initiative As global energy demand increases, photovoltaic power generation has become the solution to the energy conundrum.

How many hours a day are high electricity prices in Nordic countries?

oAverage of 90 hours in Nordic countries in 2023 simultaneously, the number of hours with high electricity prices has risen significantly. Before 2021, there were only a few hours with prices exceeding 200 €/MWh, but these became much more frequent during 2021 and 2022 due to the energy crisis.
