Overview

What is a 4KW solar inverter?

What Is A 4kw Solar Inverter, And How Does It Benefit You?

A solar inverter is an eco-friendly device that converts the direct current (DC) electricity generated by your solar panels into alternating current (AC) electricity. This AC electricity can then be used to power your home or business.

What is an FGI solar inverter?

The AN-FGI series is a versatile DC to AC solar inverter designed for off-grid solar power systems. This model supports both 12V and 24V battery input, automatically detecting the battery system voltage upon startup.

Does a solar inverter support 12V and 24v battery input?

This model supports both 12V and 24V battery input, automatically detecting the battery system voltage upon startup. Based on the voltage level, this 4.2 kW solar inverter delivers different rated output power, ensuring optimized performance and energy efficiency.

How does the 4.2 kW inverter work?

Automatic Voltage Detection: No need for manual settings — the 4.2 kW inverter intelligently identifies your battery voltage and adapts accordingly. Freely match 12VDC or 24VDC according to user needs (the maximum load is 2300W for 12V battery can carry, and the maximum load is 4200W for 24V battery battery can carry).
