

High quality 5kw solar system in Dominican-Republic

Overview

Are there solar power stations in the Dominican Republic?

Photovoltaic Power Stations (current and possibles - in study) in Dominican Republic. Own elaboration. The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV electrical energy.

Why is the Dominican Republic interested in solar energy?

The framework conditions for this are provided by the world's largest energy source, the sun. Global radiation is about double that of Germany. The Dominican Republic's energy supply is largely dependent on crude oil imports at present. The rising import price of this limited energy source is leading to increased interest in solar power.

Is photovoltaic technology right for the Dominican Republic?

Here, too, photovoltaic technology is the method of choice. As the largest solar park in the Caribbean with a total capacity of 116 MW (phase I - 58 MW, phase II - 58 MW), the Montecristi solar park has laid the foundation for a sustainable turnaround in energy policy in the Dominican Republic.

What makes Dominican Republic a dream destination?

In the Dominican Republic and the entire Caribbean region, thoughts of white beaches and dream holidays are inevitable. The framework conditions for this are provided by the world's largest energy source, the sun. Global radiation is about double that of Germany.

High quality 5kw solar system in Dominican-Republic
