

Home solar light mode

Overview

What is routine solar mode?

With the routine Solar mode, you can make optimum use of the electrical energy produced by your solar panels. If you are not at home, Niko Home Control will activate your devices automatically when sufficient solar energy is available. This way, you will use less energy from the grid.

Can I create a solar mode for a Niko home control installation?

You can only create one solar mode per Niko Home Control installation. You can turn the solar mode on and off in the Niko Home app or on the digital black. You have a Niko Home Control installation with devices that you can use in the routine Solar mode (*). You are in the Create overview window.

How long should a solar device be minimally activated?

Set how long each device should be minimally activated for when the device is started by the solar mode in Duration (1 sec. - 23 hours 59 min. 59 sec). When this minimum duration has expired and there is still injection of solar energy into the grid the device remains ON, when there is no injection the device is turned OFF.
