Overview

Can a 2KW inverter handle a 750W pump?

It is a stock standard 750W pump on a 2KW Chinese inverter. The issue is that the inverter can't handle the spike to start the pump. I am not sure if it is the inverter itself (which should be able to handle a 4kw spike) or if the surge in power requirements, increase the draw from the batteries (3kw surge = 125 Amps).

What appliances can a 2K watt inverter power?
