

How many 5G base stations are there in Hanoi

Overview

How many 5G stations are there in 2025?

According to the Ministry of Science and Technology , as of early May 2025, network operators have installed 11,591 5G base transceiver stations (BTS), equivalent to 7.72% of 4G stations. About 26% of the population has access to 5G services. According to the plan, the number of 5G stations will gradually increase in the last months of 2025.

How many 5G BTS stations are there?

Up to now, the whole country has only 11,591 5G BTS stations; 26% of the population has access to 5G services. Network operators plan to speed up the installation of 5G BTS. Photo: VNPT.

How many 5G base stations are there in China?

Xie Cun, director of the information and communication development department at the ministry, said that Chinese operators have already deployed more than 1.15 million 5G base stations, accounting for more than 70% of the global total, and 5G network coverage has been achieved in urban areas of all prefecture-level cities.

What is the range of a 5G base station?

5G base stations use millimeter waves that are extremely limited in range. Each 5G base station has a range of between 800–1000 feet, or 0.15–0.19 miles. It makes up for its limited range by surpassing 4G in other key areas: data transfer speeds (bandwidth), latency, and capacity.
