

How many outdoor power supplies are there in Uzbekistan

Overview

What is Uzbekistan power market?

Meaning The Uzbekistan Power Market refers to the entire electricity generation, distribution, and consumption landscape within the country. It encompasses power generation plants, transmission and distribution infrastructure, as well as the end-users, including residential, commercial, and industrial consumers.

How is electricity generated in Uzbekistan?

Electricity Generation in Uzbekistan Compared to other Central Asian countries, electricity generation in Uzbekistan is less diversified and 90.8% of electricity in 2023 was generated from fossil fuels. Natural gas is the dominant source, followed by hydropower and coal. The contribution of wind and solar energy is negligible to date.

What are the main sources of energy in Uzbekistan?

In addition to fossil fuels, another important source of energy in Uzbekistan is hydropower, but its potential is not fully utilized. The country has a significant resource both for the construction of small hydropower plants, for example in Andijan, Samarkand and Surkhandarya regions, and large hydropower plants mainly in Tashkent region. Table 2.

How much energy does Uzbekistan use?

According to the Statistical Review of World Energy 2024, primary energy consumption in Uzbekistan in 2023 amounted to 2.10 exajoules and was dominated by natural gas – 80%, ahead of oil – 10.3%, coal – 6.5%, and hydro – 3.2% . Figure 2. The Production and Consumption of fossil fuels in Uzbekistan (left – coal, in the center – gas, right – oil)
