

How many volts does the Russian base station power supply have

Overview

What is the voltage in Russia?

The voltage in Russia is 230 volts and the frequency is 50 Hz. Russia has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.

What is the standard voltage of a power socket in Russia?

All power sockets in Russia provide a standard voltage of 220V with a standard frequency of 50Hz. You can use all your equipment in Russia if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia.

Does Russia have a power outlet?

Russia uses the same power outlets as most European countries including Finland, Sweden, France, Germany and Spain. If your plug is not 2 pronged and circular shaped, you'll need an adapter. Voltage in Russia is between 220V and 240V.

What type of plug is used in Russia?

In Russia, types C and F are the official standards. Like almost all Continental European countries, Russia has standardized on the German plug and socket system. What is the mains voltage in Russia?

The voltage in Russia is 230 volts and the frequency is 50 Hz. Russia has standardized on type F sockets and plugs.
