

# How many volts of solar container lithium battery can be used with an inverter

## Overview

---

How many batteries can a solar inverter charge?

This applies to all types of solar inverters regardless of size. The number of batteries you can connect to an inverter cannot be more than 12 times the inverter charging current. A 20A charger can handle 240ah battery maximum. The formula is  $A \times 12 = \text{battery capacity (ah)}$ . If it is a 40A charger the limit is 480ah.
