

# How much does a Dublin solar rooftop BESS cost per panel

## Overview

---

How much does a solar panel installation cost in Ireland?

A typical solar panel installation cost in Ireland for an average house in 2025 will end up costing in the range of €5,000–€8,000. This price has factored in grants from The SEAI. These upfront figures have a payback period in the order of 6–7 years, a notable improvement from a decade ago when paybacks were 10+ years.

How much does solar cost in Dublin?

One of the main reasons homeowners search to see how much does solar cost in Dublin is the strong support available through the SEAI grant. The scheme offers €800 per kWp installed (up to €1,800) but be careful, the additional €600 bonus for homes that include a battery is no longer available.

How many homes in Ireland have solar panels?

There are roughly 110,000 homes in Ireland with solar panels. Solar panel prices in Ireland are also decreasing, with government grants and discounts making it easier for everyone to enjoy the perks of clean renewable energy. Furthermore, most homeowners no longer require planning permission, slashing the cost of installing solar panels even more.

What happened to solar panels in Ireland in 2023?

In May 2023, the Irish government abolished the 13.5% VAT on the supply and install costs of solar panels, instantly cutting about €1,000 off the average installation cost. Prices remain much the same this year compared to last. The grant has come down over this period so this points to a modest reduction in costs.
