

# How much does a Tunisian lithium iron phosphate battery pack cost

## Overview

---

How much does a lithium iron phosphate battery cost?

Generally, the lithium iron phosphate battery price stands between \$600 to \$800. The price bracket of a 24V LiFePO<sub>4</sub> battery is not different from a 12V battery. However, an increase or decrease in capacity can differentiate the price. It also ranges between \$600 to \$900, in 200AH capacity.

Why are lithium iron phosphate prices so high in South Korea?

During the first quarter of 2025, the lithium iron phosphate prices in South Korea reached 19200 USD/MT in March. Geopolitical tensions and disruptions in global supply chains affected the availability and cost of raw materials used in LFP battery production, impacting prices.

How will competition affect lithium iron phosphate battery prices?

Market Competition: The entry of new players and increased competition in the LiFePO<sub>4</sub> battery market can put downward pressure on prices. Industry experts predict that lithium iron phosphate battery price per kWh could decrease by 30-50% over the next five to ten years.

Why are lithium iron phosphate prices so high?

As per the lithium iron phosphate price chart, prices in the US were influenced by a complex interplay of factors, including the rising demand for electric vehicles (EVs) and energy storage systems, the increasing investment in domestic LFP battery production, and potential challenges related to supply chain bottlenecks.
