

# How much does the best solar panel cost

## Overview

---

The average homeowner spends \$19,873 on solar panels. But costs range from \$12,600 to \$33,376 depending on system size and location. Take control of your energy costs with solar power. How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.

How much does solar cost per watt?

For reference, the national average cost of solar panels is \$3.03 per watt. Solar rebates help make solar more affordable by directly lowering the upfront cost of a solar installation. If you have access to solar rebates, consider yourself lucky! They are few and far between these days.

Do solar panels save money?

In 10 years, your utility rate might be 50% higher than it is today, and a high-efficiency solar panel might produce 5% more power than a higher degradation one. This translates into tens of dollars of extra savings every month. And those rates compound as the solar savings keep accruing. How can I lower the cost of solar panels?

## How much does the best solar panel cost
