

How much is a 75ah cylindrical lithium titanate battery

Overview

What is a lithium titanate battery?

The lithium titanate battery (LTO) shares many characteristics with the lithium-ion battery. One difference is the LTO anode. An LTO battery uses lithium titanate oxide, while a lithium-ion battery uses carbon. By using lithium titanate, the battery has a significant performance improvement.

What is a 12V 75Ah lithium ion battery?

This 12V 75Ah lithium ion battery are develop to high efficiency energy output compared to lead acid batteries, the series battery can accept to 1C contiuous charge/discharge current which can make the battery full-charged in one hours. Built-in high accurate LiFePO4 production technology, which can extremely expend the cycle to 4000times@80%DOD.

How long do LTO batteries last?

The LTO batteries are known for their super long cycle life up to 30,000 times, high rate discharge/fast charge ability and good high/low-temperature performance (working temperature range:-50°C-60°C). We have a full range of LTO cells for you.

Are LTO batteries better than other lithium ion batteries?

LTO batteries can charge faster than other lithium-ion batteries, operate at lower temperatures, and last for more than 25,000 charge and discharge cycles. Our LTO batteries are safer and provide superior charge/discharge power over a longer lifespan than standard lithium-ion batteries. Differing milliampere-hour (mAh) options available.
