## Overview

---

Is bigger better for energy storage cells?

While pioneering the mass production of this cell, CATL, guided by its philosophy of creating real value, engaged the industry in exploring the optimal solution for next-gen large storage cells and fostering orderly, healthy development. The industry consensus is that bigger isn't always better for energy storage cells.

How safe is energy storage?

It achieves a defect rate at the PPB (parts per billion) level, a safety control level of 7.5 Sigma, a 50% increase in production cycle speed, and a 57% reduction in carbon emissions. The core mission of the energy storage industry is to provide customers with truly reliable, efficient, and safe solutions.

What are the advantages of CATL energy storage cell?

CATL mass-produces 587Ah energy storage cell. Offers optimal balance: 10% higher density, 96.5% efficiency, PPB defect rate. Passes safety tests, reduces components by 40%, boosts ROI 5%. Sets new industry benchmark.
