

# **Huawei downgrades solar panels in Lithuania**

## Overview

---

Does Lithuania block Chinese manufacturers from remotely accessing solar power plants?

Lithuania's parliament Image: BigHead, Wikimedia Commons The Lithuanian parliament has passed legislation blocking Chinese manufacturers from remotely accessing the country's solar, wind, and storage facilities.

Can Lithuania map out PV manufacturing to 2030?

The goal is simple: to map out PV manufacturing out to 2030 and beyond. Lithuania passed legislation to limit the ability of Chinese inverter manufacturers to remotely access the country's solar plants.

Will Lithuania install a solar PV system by 2030?

Lithuania is seeking to install 5.1GW of solar PV capacity by 2030 under its National Energy and Climate Plan (NECP), which was updated last year. European solar trade bodies have previously called for greater cybersecurity strategies as digital infrastructure and data become increasingly important in the development of physical energy resources.

Can Chinese manufacturers access a power supply in Lithuania?

With China included on the list, the law prohibits Chinese manufacturers from accessing systems they supply in Lithuania, preventing them from remotely managing power parameters or turning devices on or off.
