

# Hungarian Pec Repair Tool Battery

## Overview

---

Does PEC have a service centre in Germany?

Besides these new manufacturing locations, PEC is also opening a new service centre in the south of Germany. 2019 PEC wins several new contracts in Automated Cell Finishing for large format automotive grade cells, including the UK's Battery Industrialisation Centre (UK BIC).

Why did PEC retool its equipment?

In 2016, PEC retooled its equipment to accommodate prismatic cells, which remain in daily use and have operated flawlessly for over 14 years. Over the years, PEC has continued to install numerous automotive-grade cell finishing lines, refining and upgrading its standard solutions for OEMs and tier-one automotive suppliers like JCI.

What is PEC's new cell testing equipment?

2016 PEC announces its latest generation Cell Testing Equipment - the ACT0550. The ACT0550 is the system of choice for high precision high power cell testing. 2015 PEC starts delivery of the first Cell Finishing Line to VARTA Micro Batteries, the global leader in small rechargeable Li-ION cells for Bluetooth headsets and wearable electronics.

What is PEC technology?

The PEC technology reduces energy consumption and improves cell performance and yield. Hybrid Cell manufacturing is decoupling Electrode production, Cell Assembly and Cell activation by supplier, location and time.
