

Hungary Pécs flow battery energy storage container

Overview

Hungary's largest operating standalone battery energy storage system (BESS) has been inaugurated today: MET Group put into operation a battery electricity storage plant with total nominal power output of 40 MW and storage capacity of 80 MWh (2-hour cycle). Where is the largest battery energy storage system in Hungary?

Image: MET Group. IPP MET Group has put a 40M/80MWh BESS in Hungary into commercial operation, deployed using technology from Huawei. The 2-hour battery energy storage system (BESS) is the largest in Hungary, Switzerland-headquartered MET Group said, deployed at its Dunamenti thermal power plant in Százhalombatta, near Budapest.

Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Is Hungary stocking up on battery backup?

Hungary isn't alone in stocking up on battery backup as it charts its green energy path. In neighbouring Bulgaria, a massive 124 MW/496 MWh battery energy storage system went live in Lovech earlier this year.

Which country is preparing to deploy 200 mw/400 MWh of battery storage?

Meanwhile, Serbia—Hungary's southern neighbour—is preparing to deploy 200 MW/400 MWh of battery storage capacity. The planned systems are expected to be collocated with utility-scale solar farms, helping the country manage intermittency and improve energy resilience. The Dunamenti BESS is part of MET Group's broader play across Europe.
