

India Solar Containerized Grid-Connected Model Price Quote

Overview

SolarSquare started in 2015 with the desire to escalate the mass adoption of solar in India. We're now the third-largest EPC contractor in the country, having served 12000+ homes and 120+ housing societies.

Why is India adopting on-grid solar systems?

India is adopting on-grid solar systems due to their efficiency and affordability. A 1 kW solar system generates 1,440 units annually, averaging four units daily. It's perfect for homeowners trying to cut electricity costs. On-grid solar systems offer extensive product warranties.

How much does an on-grid solar system cost in India?

Due to their flexibility and excellent returns from net metering, most Indian homeowners prefer on-grid systems. 1 kW on-grid solar systems cost roughly Rs. 66,999, while 10 kW models cost over Rs. 4 lakhs. Location and other factors can greatly affect these expenses. On-grid solutions can save money over time, but the initial investment is high.

Which components affect the total on-grid solar system price in India?

The components you choose directly impact the total on-grid solar system price in India: Solar Panels: Tier-1, high-efficiency panels (Monocrystalline PERC or Bifacial) will be more expensive upfront but offer better performance and reliability.

What is a grid connected solar system?

A grid-connected solar system (also known as an On-grid solar system) has 4 major components such as PV Modules, Grid-Tie Solar Inverter, Balancing of System, and Net metering. Some components of this solar system are provided by solar companies and net metering is provided by the electricity board.
