

Industrial plant of the Monterrey Energy Storage Station in Mexico

Overview

How will the Monterrey facility closure affect EnerSys employees?

Employees affected by the Monterrey facility closure will be provided with severance packages and support to assist in their transition. Additionally, EnerSys will coordinate with suppliers and partners to ensure minimal disruption in order fulfillment and customer support during the restructuring period.

How many solar panels are in Monterrey?

Part of an \$18 million plant expansion investment, the newly installed solar panel array is the largest project of isolated battery-powered supply in Mexico. In total, close to 10,000 panels have been installed across Monterrey's three plants, with plans to be producing energy in 2024.

What makes Monterrey a responsible energy management company?

The Monterrey site's responsible energy management relies on continuous improvement, strategic project development and implementation and company culture. To reduce energy waste, the team has invested in significant upgrades and replacements in leak testers, illumination technology, roofing and air compressors.

What are the sustainability outcomes of Trane Monterrey?

Sustainability outcomes: As extreme drought and rising temperatures result in increasing restrictions on water and energy use in Monterrey City, Mexico, the team at our Trane Monterrey facility is leading the way to create sustainable solutions for its operations.
