

Install solar panels on rooftops by 2025

Overview

Is rooftop solar a viable energy solution in 2025?

Rooftop solar power has transformed from a niche technology into a mainstream energy solution, with over 4.4 million American homes now powered by solar panels. As we enter 2025, technological advances, improved financing options, and strong federal incentives have made rooftop solar more accessible and cost-effective than ever before.

Will new homes benefit from rooftop solar?

New homeowners stand to benefit from rooftop solar and cheaper bills, with the Future Homes Standard being published this Autumn. Working people stand to save hundreds of pounds off their energy bills as the government confirms new build homes will have solar panels by default, unleashing a rooftop revolution.

Can solar panels be installed on a roof?

Installing solar panels on a roof is an excellent way to reduce energy costs, lower your carbon footprint, and increase your building's energy independence. Whether you're installing solar panels on a residential home, a commercial office building, or a manufacturing facility, the process is quite similar.

Can a warehouse be converted into a rooftop solar site?

In Anhui, an old industrial warehouse has been converted into a 5 MW rooftop solar site. This site now powers cold storage units and feeds extra power back to the grid. China added 60 gigawatts (GW) of new solar power capacity in the first three months of 2025.
