Overview

How does a 5kW inverter function?

When the panels generate 5kW of power, the inverter uses this power to charge the batteries and produce 5kW of AC power. Overnight, the inverter can use the stored DC power from the battery to generate up to 5kW of AC power.

Is a 5 kW inverter worth it?

It could be that the system will spend such little time providing above 5 kW, once shading and losses are taken into account, that it's not worth the cost of getting the next-largest inverter.
