

Inverter A2-1 5kw

Overview

What is a variable frequency inverter?

1.5kW variable frequency inverter comes with LED display, start frequency 0.40Hz~20.00Hz, and speed adjustment range 1:50. The frequency drive for single phase motor inputs single phase 220-240v for home use, output 1 phase 220V 0-400 Hz for single phase motor.

How does a 2 hp single phase inverter work?

The 2 hp single phase inverter is equipped with multiple vents and built-in cooling fans to keep the temperature inside the inverter stable. An internal cooling fan cools the drive's internal components and forces air circulation to accelerate heat dissipation.

What is a LED screen on a 2HP variable frequency drive inverter?

The LED screen of the 2ph variable frequency drive inverter can display the real-time running status to make parameter setting and data adjustment, provide some fault information to prevent damage to the frequency drive for single phase motor, and then prolong the service life of the 2hp inverter.

What is a 3 phase inverter VFD?

And it uses the US intel and SILICON LAB's chip. The input for this VFD is 1 or 3 phase, and the output is 3 phase. This inverter VFD uses a unique control method to achieve the high moment of force, high precision, and wide speed regulating range driving.
