

# **Invest in becoming an solar container energy storage system integrator**

## Overview

---

How is the energy storage inverter industry changing?

new entrants to compete for market share through the industry's next phase of rapid growth. The competitive landscape is diversifying. With significant project pipelines dwarfing the existing installed base, energy storage inverter (power conversion system - PCS) manufacturers are expanding their presence target.

Can a system integrator save money?

By doing this, IPPs like NextEra in the US and Eco Stor in Germany (two examples) can save on the cost of hiring system integrators, and this approach accounts for a 'significant share' in some local markets, Shi and Rambli said.

How big will energy storage be in 2025?

Annual grid-connected energy storage installations from 2020 to 2025, reaching 15.1GW/47.8GWh. At the same time, annual hardware revenues (battery modules, PCS and balance of plant) of US\$4.2 billion in 2020 will rise to US\$9.5 billion in 2025. This rapid acceleration is happening - despite a continu.

Which solar companies are planning their own battery cell production?

Canadian Solar, via its BESS subsidiary e-Storage, is also sixth in the global ranking. They also said that such companies are also planning their own battery cell production, mirroring their vertical integration strategy in the PV module supply chain.

## Invest in becoming an solar container energy storage system integrator
