

Iran Energy Chemical Small Container Station

Overview

Does Iran have a petrochemical industry?

Fueled by abundant feedstock and a strategic ten-year plan, Iran's petrochemical industry is expanding rapidly. Exports saw a robust 6% increase in 2023, reaching 27.6 million metric tons. This translates to impressive revenue, with petrochemicals now boasting a 33% share in non-oil exports, second only to the nation's crude oil revenue.

What is the product mix of Iran petrochemical industry?

Important to note: The product mix can vary based on market demand and production capacity. Iran aims to expand its production of high-value products like polypropylene and paraxylene. The Iranian petrochemical industry is experiencing positive growth momentum, aiming to become a significant global player.
