

# **Is there a time limit for replacing batteries in the battery cabinet**

## Overview

---

The maintenance interval for replacing the battery is 5 years. After this period of time, the battery must be replaced. When should I replace my ups battery?

It's important to note that it is quite risky to wait for a sign of impending failure before opting to replace your UPS batteries. When the UPS sounds a low battery alarm or displays another sign of battery illness, you may not have ample time to schedule a service call and obtain the necessary replacement batteries before the battery dies.

When is it time to replace a battery?

When it's time to replace your battery, it may also be time to replace your UPS (Uninterruptible Power Supplies) unit! When it is time to replace the battery, we recommend that you check not only the battery life but also whether the equipment life has come to an end. The battery life of a typical lead-acid battery is 2 to 5 years.

How often should a battery be replaced?

The maintenance interval for replacing the battery is 5 years. After this period of time, the battery must be replaced. If the device (with battery installed) is not used for an extended period of time, you should verify/replace the battery. Remove battery and then make the manual measurement.

How often should a controller battery be replaced?

The controller battery buffers controller data (BIOS cmos, NVRAM, RTC). The maintenance interval for replacing the battery is 5 years. After this period of time, the battery must be replaced. If the device (with battery installed) is not used for an extended period of time, you should verify/replace the battery.
